

Ecological Consultancy for Planning

Services

- **Preliminary Ecological Appraisal/Ecological Constraints Study**
A quick & cost effective appraisal of a proposed development site to establish key ecological constraints and to develop a scope of work required to bring forward a planning application.
- **Ecological/Environmental Impact Assessments**
Full reports and assessments to inform planning applications, whether as part of a wider Environmental Statement or as a standalone document.
- **Protected Species Surveys & Assessment**
Covering all UK species including licensed surveys for protected species such as bats, birds, dormice, great crested newts and otters.
- **Ecological Mitigation & Enhancement Strategies**
Where impacts are unavoidable, Ecological Mitigation Strategies are guaranteed to be robust, pragmatic and aim to add value to your project.
- **Landscape/Habitat Management Plans**
Incorporating other environmental disciplines to create an overarching, integrated and easy to understand document to inform ongoing site management.

"Greenwood Ecology & Conservation consistently provides an excellent service for my clients. Pete is very approachable, thorough and efficient. I have every confidence in the ecological advice and reports provided by Greenwood Ecology & Conservation."

Debbie Crowther MA (Oxon) MSc MRTPI
Planning Consultant based in South Devon
